

Teeth connectors for PIR-plates type TCS

Aluminium plate teeth connector with punched-in prone points. Size 400 x 400 x 230 mm

Application

- The TEETH Connector is an aluminium plate with punched-in prone points to hold two duct segments of duct together. It is a cost effective alternative to standard aluminium flanges for small ductwork. It can also be used as a fabricated duct closure
- Low pressure application only (max 500 Pascal)
