

## Motorisation sets for large fire dampers type KIT BFNT

Motorisation kit for large fire dampers.

### Application

- For changeover of dampers with manual mechanism with fusible link towards à motorized mechanism  
**KIT BFNT-24** and **KIT BFNT-230** for **CR2** ( $\emptyset > \emptyset 400$ ) and **CU2** ( $L+H > 1200$ )
- For replacement of defect fire damper servomotor

### Composition

- Belimo actuator with spring return BFNT type equipped with a thermo-electrical fuse.
- Mounting screws and shaft extension for changeover from manual fusible link mechanism CFTH of MFUS(P) towards motorized mechanism
- Mounting plate only needed when replacing CFTH mechanisms, not to be used for replacing MFUS(P) mechanisms
- Mounting instruction

### Mounting

- According included mounting instruction
