

Condensate pumps type PUMPKIN 10

The slim condensate pump Pumpkin10 with a separate 2-stage detection block is very convenient for installation in a mounting duct thanks to its small dimensions. The 2-stage detection block switches the pump on/off.

The condensate pump Pumpkin10 consists of a pump, a detection block, vibration dampers and mounting material.

Application

- Split units up to 10 kW

Specifications

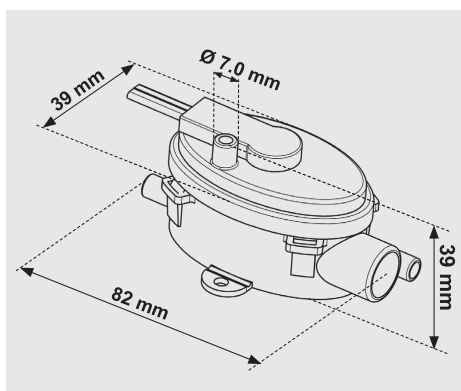

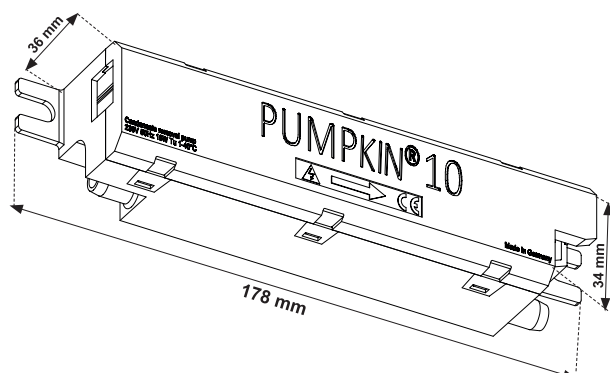

- Max. flow rate: 9 l/h
- Max. head of the discharge: 10 m
- Max. length of suction side: 1,5 m
- Noise level: 29 dB

Mounting

- Directly on the drainage hose
- On the drainage of the condensate tray
- Can only be placed horizontally

Dimensions

- Pump (L x W x H) : 151 x 33 x 33 mm
- Detection block (L x W x H): 82 x 39 x 39 mm

Technical data

- Supply voltage: 230 V AC
- Power consumption: 15 W (operation) and 1 W (standby)
